

# Software Product Engineering Services

HELPING YOUR BRIGHTEST IDEAS MEET THE TECHNICAL EDGE

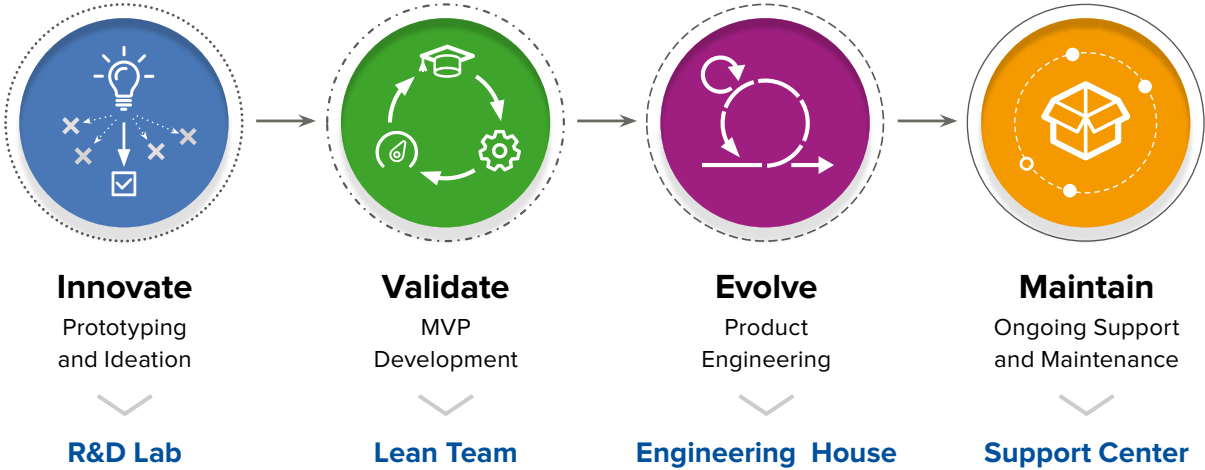

25 Years: Engineering the Future

# Software Product Engineering

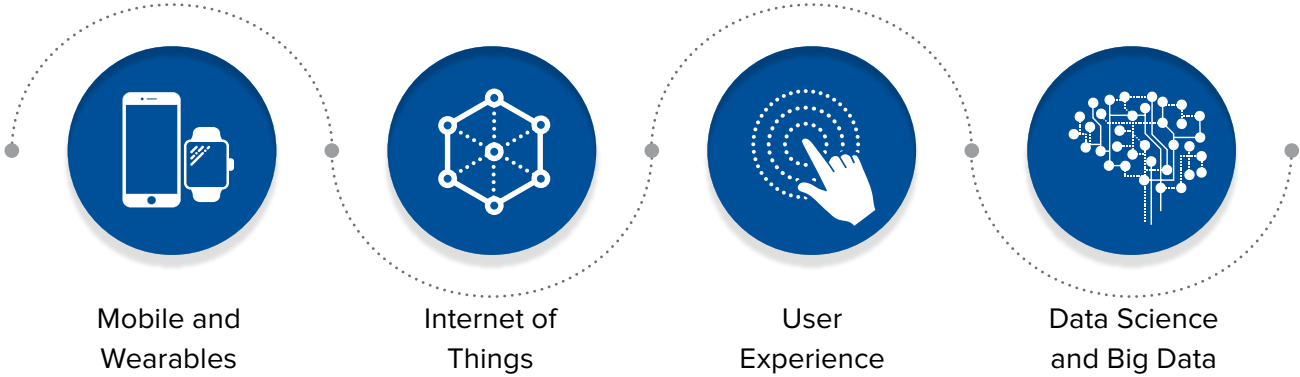

We cover all aspects of the software engineering process, starting with your strategy, allowing you to remain focused on your core business and market.

We are ready to start as early as you have an idea to validate or at any other stage of the software product development lifecycle — to fill specific skill shortfalls, accelerate schedule, or improve quality — and stay there to ensure the successful outcome for each phase of the process.

## Our Key Expertise

We constantly invest in R&D and quickly adopt new technologies. This allows us to stay ahead of the market and bring innovation to your business as soon as possible, cutting time to market and ensuring your advantage over the competition.

### Why ELEKS

- Designing **award-winning** products since 1991
- In-house **R&D Lab**
- **Solution-driven** approach
- Engineering **excellence**

## Key Industries

## Our Work

### Media and Entertainment

#### Digital Platform for X-Factor TV-Show

Interactive audience engagement from a webcam to the stage. Peak load of 250,000 unique visitors during a live show. Three seasons on the air.

### Internet Retail

#### Large Online Retailer Website

High traffic e-commerce solution for one of Europe's largest online retailers. API for mobile applications, security, payments, performance, fault-tolerance, and scalability.

### Government

#### Comprehensive Customs System

CAESAR II, a comprehensive system supporting administration and business processes of import GST, as well as administration and collection of customs and excise duty.

### Financials/Global Trade

#### Global Credit Risk Management System

An integrated Credit Risk Management System (CRMS) that streamlines and automates processes related to counterparties, contracts, and risks management.
