

ALLIANCE FOR SMART AUTOMATION SOLUTIONS

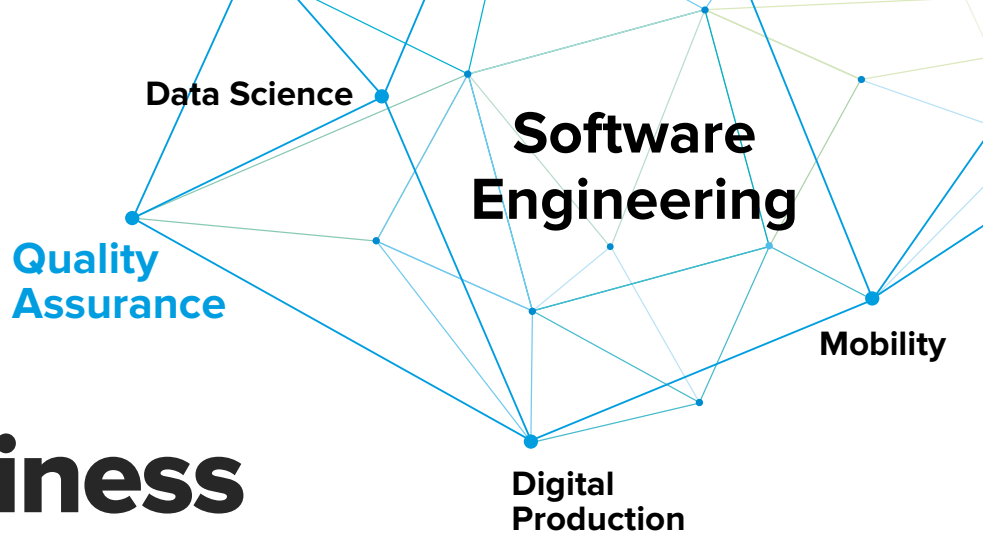

**SmartBear Products Experience
since 2008**

**System Integrators /
Consulting Partner**

**Certified
Professionals**

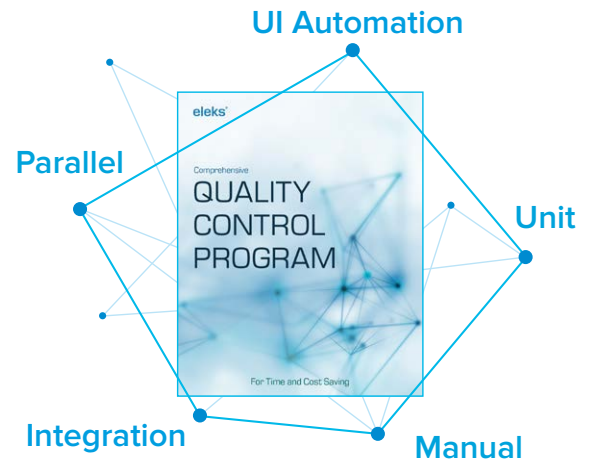

” Pooling broad expertise and experience in the delivery of Automated Testing solutions through the SmartBear products, ELEKS became a reliable and trusted partner for SmartBear.”

John McArdle
EMEA Channel Director,
SmartBear

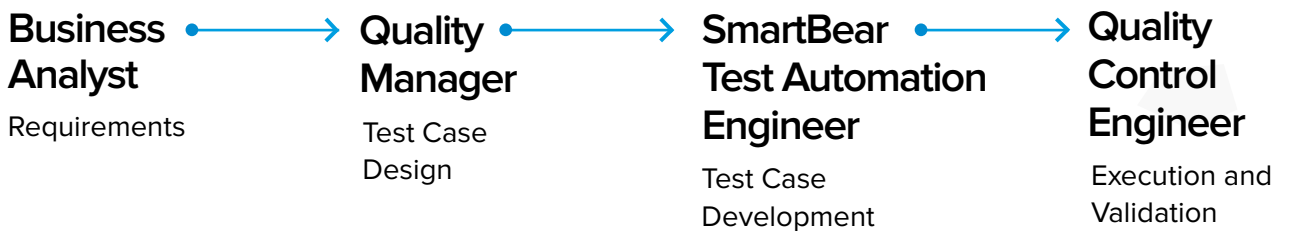

The Business Value of Quality

Realizing the value of quality products, at ELEKS we transfer customer concerns into our responsibility to achieve an uncompromised quality guaranteed. With the integrated approach to Quality Assurance, ELEKS leverages diverse testing types, complementing each other in order to achieve increased end-user satisfaction and loyalty.

Quality Management

Similar to project management best practices, ELEKS applies Quality Management in order to facilitate the achievement of quality objectives and to deliver highly effective solutions. Quality Management requires involvement of quality assurance engineers on all stages of Software Development Lifecycle.

Certification
by **SMARTBEAR**

ELEKS Testing Center of Excellence

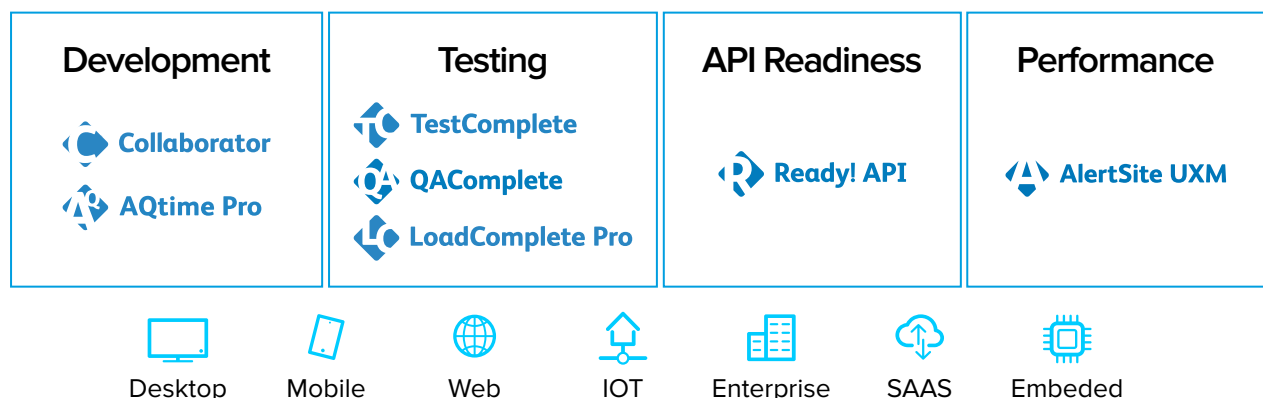

Powered by seasoned experts, our Testing Center of Excellence (TCoE) incorporates SmartBear-certified professionals to drive customer-valued results.

ELEKS and SmartBear Solution-Driven Alliance

Dedicated to delivering the highest value for customers, ELEKS and SmartBear join efforts to yield effective results in Test Automation.

SmartBear Products Range

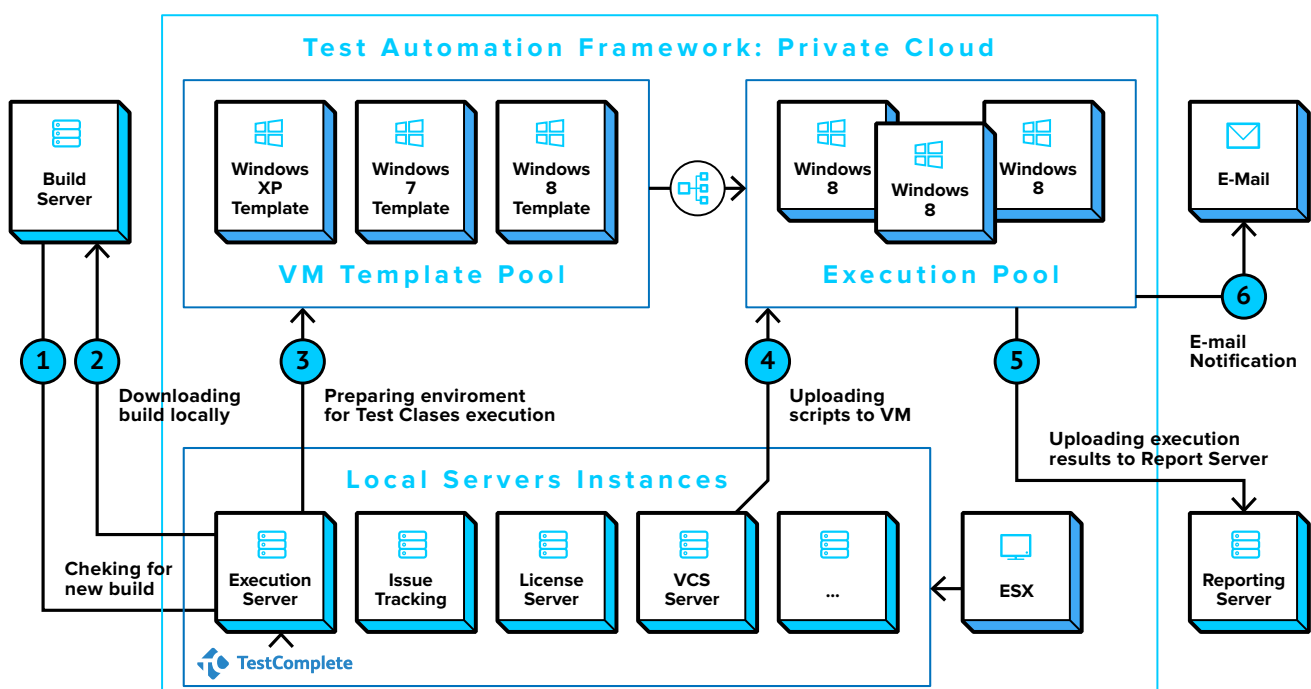

To offer the potential for comprehensive quality, SmartBear provides a broad spectrum of products.

ELEKS Robust Environment for the TestComplete Platform

ELEKS has put TestComplete and SoapUI NG Pro in its automation practice.

Sharpened by professional competence, ELEKS automation experts successfully designed a custom Test Automation Framework to best match the TestComplete Platform and effectively deliver comprehensive solutions.

Increased Test Accuracy and Stability for a Computer-Integrated Manufacturing Solution

Industry: Semiconductors

Customer: US-based manufacturer of flash memory microcontrollers and mixed-signal on system-on-chip (SoC) solutions.

The main challenge was to develop extremely stable automation tests with **over 200 incremental steps** for continual execution within **12 hours**.

Benefits

- Increased testing accuracy
- Lowered IT budget **by 30%**
- Decreased time spent on testing **by 5 times**

Why TestComplete

- Precise detection of the project's specific components
- Stable and easy development of automation scripts
- Distributed automation tests execution

Enhanced Quality with Integration Level Automation Tests

Industry: Digital Media

Customer: US e-publishing and internet digital warehouse solutions provider

The main challenge was to effectively provide API testing for extremely increasing functionality on **over 10 projects simultaneously**.

Business benefits

- Reduced number of UI defects **by 80%**
- Decreased number of UI tests **by 50%**
- Increased test coverage

Why SoapUI NG Pro

- Easy to develop and maintain API tests
- Integration with CI and other testing solutions
- Modern and flexible programming language
